

Why is Wrapping So Popular? There are very few things as powerful in growing a business as being seen. Advertisers have always called this "building Top of Mind Awareness", and wraps do it very well. The simple fact is that a vehicle wrap is one of the most important investments you will make in marketing your business. In our opinion, you always have to take care of your storefront and your web site first, then it's time to get noticed more often.

One of the best ways to be noticed and have impact is to catch people when they least expect it. And these days, there are very few times when people have the freedom to be open minded and are not multi tasking their brains off. Driving time is one of the most opportune times to catch people's attention. So if your customers, or your prospects are sitting at a stoplight, looking for something to read, why not have them read a mobile billboard for your business? Think about how effective a car wrap is, and then compare the cost to a billboard on Greenville Blvd. If you don't know, they are around \$ 2,000 per month! Now if you paid that amount of money one time to get your company advertised for years on vehicles you have driving all around town anyway, you should be getting the picture. If you haven't already experienced the power of this low-cost, high-return investment in your business, it's time to. Wraps are the number one customer recall item in several of the marketing studies performed by Evolve, Inc here in eastern NC.
